

GPS Coordinates extraction instruction sheet

Most of the information on the request form can be obtained via your county appraisal district office.

Below are instructions for obtaining GPS coordinates.

- **GPS coordinates** which can be obtained via Google Maps on your computer by:
 1. **Go to Google Maps** <https://www.google.com/maps>
 2. navigating to the property in question
 3. Click Earth box in lower left corner to view imagery

4. click on the driveway or gate that gives access to the property -- a small window will appear with the GPS coordinates and some other info within it. The GPS coordinates are the decimal degree numbers inside the pop up box at the bottom. (see attached picture example)
